36th Annual
OKLAHOMA SELECT Bull Sale
& SUPER BULL COMPETITION

ATOKA LIVESTOCK AUCTION
ATOKA, OK • 1 PM
Located at 800 East B Street, just east of Hwy. 69-75 in Atoka.
Welcome to the Oklahoma Select Bull Sale

SPECIAL GUESTS & REPRESENTATIVES
Ronn Cunningham ..................OLBA President
Jim Bob Hendrickson .................NALF Director
Mark Barker ...........................................NALF Director
Andy Rest ............................................Limousin World
Ralph Means ..................Weekly Livestock Reporter
Delvin Heldermon ................Special Representative
DeRon Heldermon ...............Oklahoma Cowman
Mark Barker, DVM ..........Professional Animal Health

Health Note: All bulls are fertility-tested and “trich” tested negative and accompanied by a health certificate indicating same.

Take note of the bulls indicated with the GE-EPDs (Genomically Enhanced Expected Progeny Differences) logo. They are the best estimate of an animal’s genetic worth as a parent after they have produced 10-25 progeny.
SELLING 86 Bulls, including

9 Purebred Bulls
All Black & Polled
4 Double Homozygous

77 Lim-Flex Bulls
76 Black & Polled
34 Double Homozygous
1 Red Homozygous Polled

SALE DAY PHONES:
Ken Holloway 580/581-7652
Sale Manager
Bruce Brooks 580/695-2036

Schedule
11 am Seedstock & Service
Mark Anderson, NALF Executive Director, and Dr. Clint Rusk, Oklahoma State University, speak on the value of Limousin genetics from pasture to plate

Noon Complimentary Lunch
Courtesy of Zoetis - Bill Jordan, representative

1 pm Oklahoma Select Bull Sale

“SUPER BULL AWARD”
All bulls are eligible to be judged in the pens the day before the sale for the outstanding bull. A belt buckle, courtesy of Tener’s Western Outfitters, Oklahoma City, will be awarded to the “Super Bull” consignor.
# USING LIMOUSIN & LIM-FLEX® EPDS TO MAKE GENETIC IMPROVEMENT

The North American Limousin Foundation (NALF) uses all available information to predict an animal’s EPD. This information includes: individual performance, pedigree, progeny and grand progeny performance, and soon genomic information. All this information is combined into one, easy to use, number that helps producers make genetic improvement in their herd.

Since the spring of 2015, NALF joined 11 other U.S. and Canadian breed associations to form the largest international multi-breed cattle evaluation in the world through International Genetic Solutions (IGS). This allows growth and carcass EPDs for Limousin and Lim-Flex® (Limousin x Angus hybrid) animals to be directly compared with Red Angus, Simmental, Gelbvieh, Shorthorn, Maine Anjou, and Chianina animals (and all their hybrid animals). This makes selection decisions easier for commercial producers.

Listed below are the definitions for Limousin and Lim-Flex EPDs and the units in which they are published. For more information visit www.NALF.org or call 303-220-1693.

## Maternal and Growth Traits

**Calving ease direct (CED):** Percent of unassisted births of a bull’s calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

**Birth weight (BW):** Predicts the difference, in pounds, for birth weight of the calf.

**Weaning weight (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

**Yearling weight (YW):** Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

**Milk (MK):** The genetic ability of a sire’s daughters to produce milk expressed in pounds of weaning weight.

**Total maternal (TM):** An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire’s daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + ½ WW EPD.

**Calving ease maternal (CEM):** Represented as percent of unassisted births in a sire’s first-calving daughters. A higher number represents more favorable calving ease.

**Scrotal circumference (SC):** Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

**Stayability (ST):** Predicts the genetic difference, in terms of percent probability, that a bull’s daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull’s ability to produce females with reproductive longevity.

**Docility (Doc):** Predicts genetic differences in the probability that offspring are scored 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

## Carcass Traits

**Yield grade (YG):** Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

**Carcass weight (CW):** Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

**Ribeye area (REA):** Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

**Marbling (MB):** Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

**Fat (FT):** Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

**Mainstream Terminal Index (SMTI):** Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

Crossbreeding, the only FREE Lunch in the Cattle Business

The Benefits of Hybrid Vigor without the Hassle: Crossbreeding made easy with Lim-Flex®

Crossbreeding for the right blend of muscle, maternal ability and profit is easier with Lim-Flex. Registered Lim-Flex seedstock, the pedigreed blend of 25-75% Limousin with Angus (black or red), features the muscle and cutability of Limousin with the marbling and fleshing ability of Angus.

Lim-Flex takes the hassle out of crossbreeding. Lim-Flex provides the right amount of Limousin and Angus to excel in any market, without the extra management of rotational crossbreeding. Whether you’re breeding calves to sell through Strauss Brands, CAB or the local livestock market, Lim-Flex not only fits, but can top the market.

Progressive producers recognize the advantages of hybrid vigor:
...20% more pounds of calf per cow exposed (due to hybrid advantages in age at puberty, conception rate, survival to weaning, milk production and weaning weight)
...1.3 years of additional cow longevity
...30% greater lifetime production
...Increased fertility and decreased gestation length with hybrid bulls

LIM-FLEX ADVANTAGES
...Flexible seedstock for simple, easily managed crossbreeding
...Flexible marketing options to maximize profit
...Flexible market progeny that consistently hit dressing percent, along with yield and quality grade targets for mainstream markets
...Flexible females adapted for efficiency across a wide range of environments

“Not only do Lim-Flex females offer unprecedented longevity, they are extremely fertile and maternally inclined.”
Andy Bailey
Star Valley Ranch, Hiko, NV

“Our cattle have to be stout, easy-fleshing, maternal, and able to fend for themselves. Lim-Flex do this better than any other type of cattle we’ve ran.”
Casey Deuter
Deuter Ranches, Ree Heights, SD

PLEASE NOTE: Minimum policy premium is $225. Additionally, any individual policy that has a premium of $900 or less, a $25 handling fee will be applied.
The Oklahoma Limousin Breeders Association is pleased to recognize David Phillips, Geary, Oklahoma, as its 2017 Commercial Producer of the Year. David and Jennifer Phillips run a diversified farming and ranching operation in Canadian County, east of Geary. The Phillips run some 2,000 commercial cows of mostly Angus and Lim-Flex genetics and some Brangus and Charolais-cross. They have used Limousin and Lim-Flex bulls for over 20 years.

Primarily a spring-calving operation, Phillips runs his calves on wheat after weaning each fall and sells them as yearlings in the spring. Phillips’ yearlings are highly sought each spring by repeat customers eager to get the all-natural yearlings with the Limousin growth and muscle genetics.

Phillips’ fondness for Limousin and Lim-Flex bulls is largely due to their calving-ease and rapid growth. In addition, the extra maternal benefits of the crossbred replacement females sired by the Lim-Flex bulls makes them an easy choice.

**Oklahoma Select Sale — 23**
IDENTIFICATION OF ANIMALS: (1) Each animal sold will have a readable tattoo corresponding to its registration paper. (2) Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately. (3) All animals to be sold will be identified by their official registration number, their tattoo and their registered name. If nicknames are used, they should be in addition to the other information. (4) The NALF board recommends that when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen.

REGISTRATION CERTIFICATES: (1) The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by the Foundation and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer. (2) It is the responsibility of the seller to provide the North American Limousin Foundation with the buyer’s complete name, address and membership number (if available) so that we can complete the transfer. It is important that the membership number be given if the buyer is already a member of NALF. (3) It is the seller’s responsibility to provide the certificate or application, and transfer information to NALF within 60 days following the date of sale, and pay transfer and registration fees.

TERMS: (1) Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

HEALTH: (1) On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale but carry no further guarantee as to the future health of the animal. (2) Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state. (3) All females sold are considered to be calfhood vaccinated for Brucellosis unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

PURCHASER’S RISK: Each animal becomes the risk of the purchaser as soon as sold. It shall be the obligation of the purchaser to see that trucking of the animal and care of the animal are taken care of prior to leaving the sale location.

ANNOUNCEMENTS: (1) Any change from the information that is printed in the catalog will be announced from the auction block. (2) All announcements made from the auction block take precedence over the printed catalog. (3) Catalogued lots not selling will be announced prior to the sale.

BREEDING GUARANTEE: (1) All animals are guaranteed to be breeders with the exception of: a. calves under twelve months of age; b. in the event of any injury or disease that occurs to the calf after sale or; c. gross negligence or willful misconduct on the part of the purchaser; d. females used in embryo transplant. (2) Bulls are guaranteed to be breeders at the time of sale or at 16 months of age if they are younger than 16 months at time of sale. Any bull which either settles cows by natural service and/or passes a fertility test made by a competent veterinarian is considered to be fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller. (3) Females sold as safe in calf have been examined by a competent veterinarian or other reproductive technician and are so guaranteed to be with calf. Cows with calf at side are considered breeders as indicated by the calf at side. (4) Any guarantee with respect to embryo transplant production shall be a separate agreement between buyer and seller.

OPTION AND PRIVILEGE OF RETURN OR ADJUSTMENT: (1) All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs last. (2) In the event that an animal is claimed to be a non-breeders, that animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original sell state. The seller shall be entitled to six months trial following the return of the animal in which to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement.

Any expense incurred in transporting the animal that is claimed to be a non-breeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser’s farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation. (3) It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly presented at a sale. The selling of an animal constitutes a contract between buyer and seller and is not the responsibility or the right of the North American Limousin Foundation or of the sale management firm to settle disagreements between buyers and sellers of cattle that have not been properly presented.

The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered to be a complete settlement. Other settlements which are negotiated between buyer and seller may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

BLOOD TYPING FOR PARENTAGE VERIFICATION: All animals sold are guaranteed to be offspring of their recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 that are to be used for embryo transplant and all bulls born between July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be sire verified through blood samples available to purchasers upon written request by the purchasers so long as written request is received by sellers within 60 days after the date of the sale of the applicable animal. Proto test guaranteed normal if done within 60 days of sale date.

INSURANCE: Anyone wishing to insure their purchases may do so by contacting the sale manager or settling clerk.

MAIL BIDS: Mailed or telephoned bids will be handled in a most confidential manner if you are unable to attend the sale personally. By contacting a representative of the sale staff prior to sale day, you will enable us to assist you at ringside on sale day.

EPDS USED IN THIS CATALOG ARE CURRENT AS OF FALL 2017
Limousin breeders and their commercial customers benefit greatly from new breeding and selection tools. The North American Limousin Foundation (NALF) has been publishing genomic-enhanced EPDs (GE-EPDs) since the fall 2015 international cattle evaluation. This provides GE-EPDs for all Limousin and Lim-Flex® animals that have completed DNA testing for genomic profiles.

GE-EPDs provide more precise EPDs based on a combination of pedigree, phenotype, and DNA. One major benefit is risk reduction through increased accuracy value on many traits - equivalent to having 8-20 progeny. This saves time when assessing young breeding stock and delivers commercial customer confidence when buying seedstock.

GE-EPDs also give the chance to collect data on economically important traits, which are expensive or difficult to measure.

The information from the genomic data can be as informative as a bull’s first calf crop or a cow’s lifetime production record. Since the genomic data is incorporated directly into the EPDs, cattle producers will not have to learn how to interpret the new data.

Animals that are genomic-enhanced will have the NALF GE-EPDs displayed on their animal detail screen and performance reports in the NALF-DigitalBeef platform. Traits that are genomic-enhanced are highlighted in yellow on these reports. Also, look for the GE-EPDs logo on animals, and in ads and sale catalogs.

Effective progeny counts for interim EPD derived from differing combinations of pedigree, performance and genomic data
